

Assessment

(Version 1.0)

Requirement

1.1 – Create a new menu item (Companies)

Step 1	Create a new database entity [Company] with the following properties: <ul style="list-style-type: none">• Id (Guid)• Name (String)• RegistrationDate (Date)• Active (Boolean)
Step 2	Seed 5 dummy records into the [Company] database table. Note: Make 2 of the records (Inactive)
Step 3	Create a new Company Controller that will return a list of all the (active) Companies in the database table.
Step 4	Create a new Angular menu item [Companies] that will populate a grid of all the (Active) Companies recorded into the database.
